A3

HIGHLIGHTS:

Extremely fast: The P-C2480i MFP prints and copies at speeds of up to 24 A4 pages/minute in colour or black and white. The first page is printed and ready after approx. 10 seconds. The system is also highly efficient, capable of scanning up to 50 images per minute. If you value quality over speed, though, you can print at an ultra-sharp resolution of 1,200 x 1,200 dpi.

Extremely mobile: The free Mobile Print app allows you to easily access the P-C2480i MFP from your smartphone or tablet and print or scan while on the go. If you opt for the wireless card, you will be able to connect up to three mobile devices at any one time thanks to Wi-Fi Direct*. You can also use NFC (near-field communication) to establish a connection between the MFP and your mobile device. This gives you a level of independence you never could have imagined before.

Extremely intelligent: The P-C2480i MFP has intelligent features to actively assist you. One example of this is the 'skip blank pages' function that automatically filters out blank pages during copying and scanning operations, thus eliminating the need for manual pre-sorting. Another example is the ID card copy feature which allows you to print both sides of small-format documents, such as health insurance/ID cards and driving licences, on a single page. You can also install applications such as Scan2OCR (for creating text searchable documents), follow-me printing or archiving solutions, all thanks to the integrated HyPAS interface.

Extremely flexible: With its 3 x 500-sheet universal cassettes* and the 100-sheet multi-bypass, the P-C2480i MFP can process different media (A6R to A3 formats) and paper weights between 60 and 256 g/m². This ensures you are always well prepared for any eventuality. In addition, the built-in job separator guarantees that everything is at hand and clearly sorted in the output tray as soon as your documents are finished printing.
